# Shivanand Devakate

shivananddevakate497@gmail.com | linkedin.com/in/shivanand-devakate | github.com/shivanand-1 | shivanand-17.netlify.app

## Education

**Government Engineering College, Chamarajanagar** 2022 – 2026
*Bachelor of Engineering in Computer Science & Engineering* *CGPA: 8 / 10*

**Chaitanya Science PU College, Vijayapura** 2020 – 2022
*Pre-University Education (PCMB)* *85%*

## Experience

**QSpiders** Jan 2026 – Present
*Data Science Intern* *Bangalore*

- Built predictive analytics and AI-based solutions using Python and Machine Learning techniques.
- Worked on preprocessing pipelines, visualization workflows, and deployment concepts.
- Implemented machine learning models on real-world datasets for optimized predictions.

**YHills** 2025
*Data Preprocessing Intern* *Remote*

- Worked on data preprocessing, feature engineering, and model validation workflows.
- Analyzed datasets using Pandas and NumPy libraries for ML applications.

## Projects

**AI Nutrition Detection System** *(YOLOv8, FastAPI, NLP, Gensim)* GitHub

- Built an AI-powered food detection and nutrition analysis system using YOLOv8 for food identification.
- Integrated a FastAPI backend with a Streamlit interface for food detection and calorie estimation.
- Utilized NLP and Gensim to recommend food items based on nutritional information.

**Student Study Helper** *(Python, LangChain, ChromaDB, Whisper, RAG)* GitHub

- Developed a Retrieval-Augmented Generation (RAG) application.
- Integrated Whisper for transcription, LangChain for retrieval, and ChromaDB for semantic search.

**Bengaluru House Price Prediction** *(Python, Scikit-learn, Pandas, Streamlit)* GitHub

- Built a machine learning application to predict Bengaluru house prices using regression models.
- Performed data preprocessing, feature engineering, model training, and evaluation.

## Technical Skills

- **Languages:** Python, SQL
- **Technologies / Frameworks:** Pandas, NumPy, Matplotlib, BeautifulSoup, Requests, Transformers, Gensim, Streamlit, FastAPI, ChromaDB, Seaborn, PostgreSQL, YOLOv8, Whisper AI, TensorFlow/Keras, Scikit-learn, FFmpeg
- **Developer Tools:** Git, GitHub, VS Code, Jupyter Notebook, Google Colab
- **Core Concepts:** Machine Learning, Deep Learning, NLP, Computer Vision, Generative AI, RAG, Feature Engineering, Model Evaluation, EDA, Semantic Search

## Certifications

- QSpiders – AI/ML Intern Developer
- YHills – Data Science Internship Certification
- CodeWithHarry – Programming Fundamentals Certification

## Extracurricular Activities

- Participated in Kho-Kho Division Level competitions.
- Attended 3+ hackathons focused on AI, Machine Learning, and Software Development.
